3rd AUN-TEPL Symposium

ASEAN University Network Technology Enhanced Personalised Learning

ASEAN University Network

Technology Enhanced Personalised Learning

25 May 2022 | 9.30am - 5.00pm (MYT)

ABOUT

The AUN-TEPL thematic network under the ASEAN University Network (AUN) was established in 2019 to foster collaboration amongst the ASEAN universities to improve student success through technology-enhanced personalised learning.

Since 2020, AUN -TEPL has been committed to promote technology-enhanced personalised learning across the network. As a key annual event, the AUN -TEPL Symposium serves as a platform with the aim of bringing together like-minded educators from universities in the ASEAN region to share and discuss best practices in the use of technology to bring about personalised learning. The symposium also aims to seek opportunities to collaborate in inter-university projects.

Join us and let's discuss on how to tailor your T&L strategy to individual students' requirements, what should be considered in personalised learning, and how the university can support your personalised learning efforts.
